## For Immediate Release:

**Dog Exercise and Conditioning:** New, modular kennel unit designed for show, sporting and breeding kennels indoors and out.

Friday, January 30, 2009 Ephrata, PA. A common sense solution is being used by GoPet, a Pennsylvania based manufacturer of canine exercise equipment, to increase dog health year-round. GoPet; interested in promoting animal health has developed a patent pending exercise product that includes *voluntary* exercise – unlike forced exercise by conventional electric powered treadmills or similar equipment. The GoPet exercise wheel allows the dog to *run at will*, with experience teaching dogs will walk and run up to 8 miles a day.

The modular 4-foot wide model CU3612, occupies 6 sq feet, can be attached to the end of a kennel unit or joined end to end in reverse, replacing an 8 foot dividing kennel panel, serving dogs in adjoining kennel units. The easy access open face and ends enhance and facilitate social interaction. These durable units are faced with easy clean fiberglass reinforced panels and foot levelers. All metal parts including the wire tread is alkaline washed, undercoated with a zinc rich epoxy coating ensuring a quality finish, unmatched corrosion protection, and maximum product life. Finish-coat Polyester TGIC is then oven baked for long life. The Polyester coating provides additional physical protection, durability, ease of maintenance and sanitation, and is known for its resistance to stretching, shrinking, abrasion and most chemicals. It is easily washed, sanitized, mildew resistant, and is quick drying and UV resistant.

Dogs up to 14-inches in shoulder height would be appropriate for model CU3612 including the Affenpinscher, Brussels Griffon, Dachshund, Griffon Bruxellois, Happa, Japanese Chin, Maltese, Pekingese, Shih Tzu, Tibetan Spaniel, Toy Poodle, Chesapeake Bay Retrievers, Basset Artesien Normand, Beagle 13, Bichon Frise, Bolognese, Bulldogs, Cavalier King Charles Spaniels, Chinese Crested, Coton de Tulear, English Toy Spaniel, German and Japanese Spitz, Jack Russell, Havanese, Jug, Lancashire Heeler, Lhasa Appso, Lowchen, Miniature Pinscher, Miniature Schnauzer, Papillion, Phalene, Podengo, Portuguese Medio, Pomeranian, Pug, Schipperke, Volpino Italiano, Terriers, and Welsh Corgi's

GoPet exercise equipment breaks the barrier of space limitations helping the dog improve the depth of their respiratory health, muscle tone, lung capacity, and stamina.

---

The GoPet Company was formed in the spring of 2006, to develop, test, manufacture, and market canine exercise equipment and provides healthy choices for animal exercise marketed under its brand GoPet® with a goal of promoting and prolonging a quality lifestyle for pets.
