Ephrata, Pennsylvania, August 22, 2008. “Our dogs run up to 8 miles a day; do yours?” tells the story of the GoPet Canine Exercise Wheels introduced by GoPet, LLC. The *DOG Powered* exercise wheel comes in two sizes, 36 and 48 inches for dogs up to 20 inches in shoulder height. Similar in appearance to a hamster wheel, GoPet’s® canine exercise wheel is crafted to support the dog and provide the equipment that enables it to exercise within a confined space. It can be free standing, or wall mounted on a kennel or house. With an optional brake, the trainer or owner can set wheel resistance to enhance workout or stabilize a “rookie or “beginner” just learning to use the exercise wheel.

The GoPet Exercise wheel provides the year round tool for expending energy, daily exercise, increased and sustained muscle tone, supporting muscular, cardiovascular, and respiratory health.

Models include House or Kennel mount - perfect for adding to an existing dog house, or kennel run and free-standing for use in the home, gym or trainer’s facility. The exercise wheel’s wire surface allows waste and debris to pass through or a mat can be attached for the tender footed or house trained canine. Coated with Polyester, each exercise wheel is attractive, mildew resistant, durable, easy to maintain and sanitize as well as quick drying.

The GoPet Company was formed in the spring of 2006, to develop, test, manufacture, and market canine exercise wheels. Realizing that a dog would walk or run up to eight miles a day without human assistance and that they enjoyed doing so; breathed life into the added health benefits the exercise wheel would bring to the canine world promoting a healthy cardiovascular and respiratory system as well as conditioning muscles and joints similar to exercise in humans.

GoPet provides healthy choices for animal exercise marketed under its brand GoPet® with a goal of promoting and prolonging a quality lifestyle for pets. Additional information is available by contacting GoPet, 2500 Division Highway, Ephrata, PA 17522, or 717-354-3399.
